

ROSE KATE ZONIO

San Mateo, Philippines | rkzonio1@gmail.com | 09475444236

SUMMARY

Computer Engineering student at the University of Rizal System seeking an OJT/internship in Software Engineering, Full-Stack Development, or Quality Assurance. Strong foundation in Operating Systems and Database Management; experienced in building practical software tools, skilled in technical documentation, problem-solving, and collaborative development—ready to apply software-focused technical skills to real-world projects.

EDUCATION

University of Rizal System, Antipolo

Bachelor of Science in Computer Engineering

2023 - Present

- Relevant coursework: Data Structures & Algorithms; Operating Systems; Database Management Systems; Software Engineering; Web Development; Programming Languages.
- Selected projects: Built academic software tools and web applications emphasizing full-stack implementation and practical problem solving

TECHNICAL SKILLS

- Languages: Python, JavaScript, PHP, Lua
- Frontend & Backend: React, Node.js, Laravel, Django, REST APIs
- Database & Cloud: MySQL, Firebase
- Tools & Platforms: Git, GitHub, VS Code, XAMPP, Cursor, Vite

PROJECTS

URSAC Simulation Academy

Feb 2026

Roblox Game, Thesis Project

- Designed and developed a full Roblox game simulating a complete University journey as part of a university thesis project, including quest systems, player interactions, and core gameplay mechanics using Lua.
- Served as both builder and coder: constructed in-game environments and programmed the full quest/education progression system, along with player interaction logic.
- Published the game publicly and maintained it with weekly updates addressing bugs and player-reported issues, demonstrating live product maintenance and responsiveness to user feedback.

Salo Sa Antipolo

Jan 2026

JavaScript, Python, CSS, HTML, Firebase

- Developed a full-stack POS web application for a known Antipolo restaurant, covering order processing, payments, inventory, and daily sales reporting.
- Streamlined order-to-payment workflows and inventory tracking to improve transaction accuracy and operational efficiency.
- Prepared technical documentation, conducted client training, and completed a formal handover for production use.

CineLookUp

Apr 2024

React, Vite, Firebase, TMDb API, JavaScript, HTML

- Built a responsive movie lookup web app
- Implemented search, movie details, and user-favorites functionality with efficient API integration and client-side caching.
- Documented the application and deployed a demo for testing and user feedback.

RFID-Based Automatic Parking Slot System

March 2024

VB.NET, SQL

- Built a parking management application that processes RFID scan input to display real-time slot availability and manage automated billing.
- Designed the backend database to track slot occupancy in real time and trigger attendant alerts upon slot selection.
- Collaborated with a team across hardware integration, application logic, and database design to deliver a working prototype.

CERTIFICATIONS & TRAINING

Google Network Security

Aug 2026

Analytics Solutions Bootcamp (In Progress)

Sept – Nov 2026

- 7-week program covering SQL, data management, data engineering, business intelligence, and applied data science/ML fundamentals, culminating in a group capstone project (final week).

EXPERIENCE

Special Program for Employment of Students (SPES)

May 2026

- Provided basic IT assistance and technical support to staff and office operations.
- Assisted with troubleshooting of computer hardware and software issues.
- Assisted in encoding and organizing resident records and maintaining digital files for the barangay office.

HACKATHONS & COMPETITIONS

GCash Hackathon

Sept 2026

- Built, designed and pitched an AI-powered concept to digitize handwritten sales records for small business owners, proposing entry extraction and basic profit/loss summaries to simplify bookkeeping.
- Collaborated with a team of classmates to develop a prototype and present the idea to GCash judges, focusing on accessibility for non-technical users.

ORGANIZATIONS

Association of Concerned Computer Engineering Students (ACCESS) ORG

2023 to 2024

- Member, Technical Team — supported technical operations and activities of the organization.
